

CONTACT LENS AGREEMENT

1. Contact lenses are medical devices that require a separate evaluation/fitting process (which is not part of the standard eye health exam) in order to obtain a contact lens prescription. Even previous contact lens patients require this evaluation to maintain the correct fit of the contacts and ensure that there are no eye health problems due to contact wear.

2. Contact lens exam fees are non-refundable. They include an evaluation of corneal measurements for fitting contacts, diagnostic contacts used to conduct the fitting process, and within a 90 day period of the initial contact lens fitting exam 4 (FOUR) free follow-up visits related to the process of finalizing your contact lens prescription only.

3. If you do not return within the 90 day follow-up period to finalize your contact lens prescription, there will be a \$30 fee for each follow-up visit needed to continue the fitting process.

4. Once you finalize the contact lens prescription, then the fitting process is considered to be completed and will be initiated again at your next annual exam. However, if you choose to try a different contact lens or want to modify your finalized contact lens prescription 2 months or longer after finalizing your contact lens prescription, then the contact lens fitting will be re-initiated and a \$30 fee per visit will be applied to each follow-up required for the new contact lens fitting process.

5. The 90 day follow up period does NOT include visits for medically related eye conditions that may or may not be related to contact lens wear (eye infections, corneal ulcers, allergies, etc.) There will be an office visit charge for these medical eye visits, which your insurance may or may not cover.

I have read, understood, and agree to abide by each aspect of the office agreements.
